

Accelerate Business Growth

Identify critical strategic and tactical actions you can take to improve revenue and profitability through the NH MEP Business Growth Collaborative Program. This is a six-workshop program and includes 3 group sessions following the workshops.

From digital marketing to conducting market research on a shoestring budget, the Business Growth Collaborative Program is limited to a maximum of eight manufacturers to ensure we focus on each company's growth challenges. Through fun, hands-on exercises and case studies, you'll learn valuable lessons to move your business forward and develop a profit-driven Business Growth Plan to help you determine strategies unique to your business that will help you reach new customers and maintain current ones.

In between the six tri-weekly workshops, you'll receive coaching and advice from the instructor, who brings more than 25 years of business experience.

For additional information contact NH MEP President Zenagui Brahim at 603-226-3200 or zenaguib@nhmep.org
